

Release Note for VigorACS 2

Software Version:	2.5.6
Release Type:	Normal
Applied System:	Windows 7, 8, 10, Linux
Open JDK Version:	13.0.2
Mariadb Version:	10.4.12

VigorACS 2 is a software which provides centralized device management for TR-069 based CPEs such as a broadband gateway, XDSL router, VoIP gateway and wireless AP. VigorACS 2 has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of CPE devices.

New Features

- Support CPU Temperature setting for CPE.

Support Model and Version

For the full model support list, please refer to Compatible Devices section in URL :
<https://www.draytek.com/products/vigoracs-2/>

Improvement

- Corrected: An issue of creating user accounts with the role of "Administrator".
- Corrected: An issue of maximum nodes of the user group exceeding 500 when converting the premium group to standard.

Known Issue

- Database (with MariaDB version 10.4.12) is only available for the user who installs VigorACS 2 for the first time. If your computer has installed MariaDB, do not upgrade the database version to prevent data loss.
