

Release Note for VigorACS 3

Software Version:	3.4.0 (Cluster)
Release Type:	Normal
Applied System:	Linux
Open JDK Version:	17.0.6
Mariadb Version:	10.6.5
InfluxDB Version:	1.8.3

VigorACS is a software that provides centralized device management for TR-069 based CPEs such as a broadband gateway, XDSL router, VoIP gateway, and wireless AP. VigorACS has device status, monitors the status of devices, or performs scheduling tasks such as firmware upgrade, configuration backup/restore, and parameter profile for mass deployment of CPE devices.

New Features

- Add the notification for reminding new release of VigorACS.
- Supports OTA(Over-The-Air) updates.
- Support the storage limitation for Alarm, Logs, Device SysLog and File Manager.

Support Model and Version

For the full model support list, please refer to Compatible Devices section in URL :
<https://www.draytek.com/products/vigoracs-3/>
