

Release Note for SmartVPN Client

Firmware Version:	5.6.0
Release Type:	Normal
Applied Operation System	Windows XP SP3, Vista 32-bit/64-bit, Windows 7 32-bit/64-bit, Windows 8, Windows 10, Windows Server 2012 R2, Windows 11

The Smart VPN Client is a VPN configuration utility. It makes VPN configuration easy for users. It could support the following VPN schemas, PPTP, L2TP, IPSec, OpenVPN, WireGuard VPN and DrayTek SSL Tunnel.

New Features

- Support various installers. Users can choose the .exe installer or .msi installer, depending on their needs.
- Support TOTP secret for VPN 2-factor authentication.
- Fill in required VPN Matcher options via importing the ".ovpn" config.

Improvement

- Improved: Unify the location of the OK button.
- Improved: Add French translation for WireGuard.
- Improved: Import the static route settings via the ".ovpn" config.
- Improved: Add a additional note suggesting user restarting their computer after installing/updating VPPP driver by built-in VPPP installing/updating mechanism.
- Corrected: An issue of running the VPPP driver on Windows 7.
- Corrected: An issue which OpenVPN would drop the VPN connection after passing 1 hour.
- Corrected: A display issue of the IP format of AllowedIPs entry if importing WireGuard config file.
- Corrected: An issue with installing the VPPP driver on Windows 10 with the built-in VPPP installing mechanism.

Known Issue

- SmartVPN Client will possibly pop up an error "Hardware failure in port or attached device." if a user tries to reconnect SSL VPN after a long-time performance test with SSL VPN.
