

Release Note for Android SMS APP

Software Version:	1.1.4
Release Type:	Regular – Upgrade recommended when convenient, as it includes general improvements and optimizations
Applied System:	Android 6.0 or later

It is a mobile application that allows users to send SMS messages via SIM card in Vigor cellular routers. In addition, the APP allows users to switch among multiple Vigor cellular routers to send personalized messages easily and quickly.

New Features

- Meet Google Play's target API level requirement. Support Android 16 (API level 36) or higher.

Improvement

- None.

Known Issue

- When TR-069 >> Enable HTTP Compression is enabled on the Vigor Router, the SMS App cannot connect to the router after the device is discovered and added. The device status is displayed as "Offline – Fail".
Workaround: Disable Enable HTTP Compression under TR-069 on the router.

Note

- Some devices (CPE) must upgrade the firmware with the newest version. Otherwise, it might not be searched by VigorSMS APP.
