

Release Note for iOS SMS APP

Software Version:	1.1.0
Release Type:	Normal
Applied System:	iOS 11.0 or later

It is a mobile application that allows users to send SMS messages via SIM card in Vigor LTE routers. In addition, the APP allows users to switch among multiple Vigor LTE Routers to send personalized messages easily and quickly.

New Features

- None.

Improvement

- Improved: Add the unread status on inbox list page.
- Improved: Add the pages of Search, Support List and About.
- Improved: Add the phone contact list for sending message to multiple clients.
- Improved: Support to input MAC address in Add/Edit profile page.
- Improved: Support to send/delete message records based on outbox cache.
- Improved: Support the new router model with LTE module (e.g., Vigor2927L, Vigor2865L).
- Improved: Update the WUI layout and add "No SIM" status on Network page.

Known Issue

- None.

Note

- Some devices (CPE) must upgrade the firmware with the newest version. Otherwise, it might not be searched by VigorSMS APP.
