

Release Note for Vigor2120 Series

Firmware Version: 3.8.1.2
Release Date: December 21, 2016
Applied Models:

Firmware Version:	3.8.1.2
Release Type:	Critical - Upgrade recommended immediately
Release Date:	December 21, 2016
Applied Models:	Vigor2120, Vigor2120n-plus

Vigor2120 series is a broadband router, which integrates IP layer QoS, NAT session and bandwidth management to help users control works well with large bandwidth.

New Features

- None.

Improvement

- Improved: Security improvements including one or more considered critical.

Known Issue

- If TR-069 settings have been set once, the router continuously crashes after downgrading to v3.7.8 firmware.

Workaround: Add telnet command "sys tr069 clear" to clear TR-069 config in flash.

Users can use this command before downgrade to avoid this problem. (But all TR-069 settings will be cleared.)
