Release Note for Vigor2132 Series

Firmware Version:	3.8.0.1
Release Type:	Normal
Applied Models:	Vigor2132FVn, Vigor2132Vac, Vigor2132ac

New Features

- Add TR-069 parameters for NAT>>ALG..

Improvement

- Corrected: HTTPs WUI did not work when enabling "Allow Management from the Internet".
- Corrected: Outbound SIP call disconnected after specific ITSP was used for 20 seconds.

Known Issue

- None.

Notes

- Please use the latest boot-loader, or need to upgrade 3752_B1 (ask your dealer) first, otherwise, it will encounter firmware upload issue.
