

Release Note for Vigor2710ne Series

Firmware Version:	3.7.2
Release Type:	Normal
Applied Models:	Vigor2710ne

Vigor2710ne is an ADSL router. It is equipped with a wireless LAN interface compliant with the standard IEEE 802.11n protocol. To boost its performance further, the router is also loaded with advanced wireless technology to lift up data rate up to 150 Mbps. Hence, you can finally smoothly enjoy stream music and video.

New Features

- None.

Improvement

- This firmware includes improvements to harden the web interface against attacks. We have become aware of specific attacks against router, including DrayTek, models where hackers have altered specific settings relating to your DNS servers and DHCP settings. You should urgently check those settings on your router. If they appear to have been tampered with, correct them and change your admin password and check for any other config anomalies. Restore a config backup if you have one (from prior to the attack). We continue to investigate this issue but the first priority was to issue updated firmware.
