

Release Note for Vigor2925 Series

Firmware Version:	3.8.4.1
Release Type:	Normal
Release Date:	April 10, 2017
Applied Models:	Vigor2925 Series

Vigor2925 series is a broadband router which integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- None.

Improvement

- Corrected: SNMP responding on the WAN when Internet management turned on and IP was not a Manager Host IP in SNMP page.
- Corrected: Vigor router would reboot due to code crash while performing configuration backup via Central Management>>Switch>Maintenance.
- Corrected: Router reboot during SMB traffic via PPTP/L2TP (related to APP QoS).
- Corrected: Create Root CA certificate start date was 1 day after time of creation.

Known Issue

- The WAN port can not work well with Alcatel I-040G device. The quick solution is to add another switch between Vigor2925 and Alcatel I-040G.

Notes

Modifications

- None
