

Release Note for Vigor2925 Series

Firmware Version:	3.8.4
Release Type:	Critical - Upgrade recommended immediately
Release Date:	December 21, 2016
Applied Models:	Vigor2925 Series

Vigor2925 series is a broadband router which integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- Support IPv6 RIPng.
- Support HA IPv6.
- Support Central Switch Management.
- Support Airtime Fairness.
- Add a new function of DNS Security.

Improvement

- Improved: Security improvements including one or more considered critical.
- Improved: AP Map Enhancement.
- Improved: IP Object web pages are designed with new style, which is convenient for users to configure mass objects.

Known Issue

- The WAN port can not work well with Alcatel I-040G device. The quick solution is to add another switch between Vigor2925 and Alcatel I-040G.
