

Release Note for Vigor2925 Series

Firmware Version:	3.8.9.4
Release Type:	Normal
Applied Models:	Vigor2925 Series

Vigor2925 series is a broadband router which integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- Add IPsec EAP option for IKEv2 LAN to LAN connection.

Improvement

- Improved: Support Vietnam SMS provider.
- Improved: Add settings related to Station Control on Central Management >> AP >> WLAN Profile.
- Corrected: Data Flow Monitor did not show RX traffic when downloading via VPN tunnel.
- Corrected: The Router Assisted Client Roaming setup did not work.
- Corrected: Unable to create IPsec xAuth VPN between Samsung S8 and Vigor router.

Known Issue

- The WAN port can not work well with Alcatel I-040G device. The quick solution is to add another switch between Vigor2925 and Alcatel I-040G.
