Vigor2928

10G Dual-WAN Security Router

The Vigor2928 is a Dual-WAN VPN router equipped with three 10G interfaces, supporting both Ethernet and fiber connections. As DrayTek's first router with a 10G Ethernet WAN, it delivers high-performance WAN connectivity for bandwidth-intensive networks. The Vigor2928 supports advanced features, including load balancing, VPN, QoS, IP/URL filtering, and a hotspot portal with built-in IAM to enhance network security. It also functions as a virtual controller for the centralized management of VigorAPs and VigorSwitches.
