Release Note for Vigor2962

Firmware Version:	3.9.6.1
Release Type:	Normal
Applied Models:	Vigor2962

Vigor2962, a security VPN router, supports multi-WAN interface with a speed up to 2.5GbE. The Ethernet interfaces are adjustable as LAN or WAN ports. It is suitable for general users, small companies, or small business firms.

New Features

- ● Support to specify Remote VPN Gateway by Domain Name.
- ● Support a new feature where routing subnet traffic can be load-balanced

Improvement

- ● Improved: Improve the ping response time.
- ● Improved: Add a new option "Downtime Limit" for VPN Tunnel on Objects Setting >>Notification Object.
- ● Corrected: An issue of a tagged VLAN with MTU 1500B not working.
- ● Corrected: An issue that a file with certain content wouldn't be transferred successfully.
- ● Corrected: An issue of WUI stuck when many SSL VPN clients dial-in at the same time.
- ● Corrected: An issue that VPN LAN-to-LAN traffic was classified as VoIP traffic in Quality of Service.

Known Issue

- ● None.
