Release Note for Vigor3220 Series

Firmware Version:	3.8.8.1
Release Type:	Normal
Applied Models:	Vigor3220/Vigor3220n

Vigor3220 Series, a broadband router, integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth.

By adopting hardware-based VPN platform and hardware encryption of AES/DES/3DES, the router increases the performance of VPN greatly, and offers several protocols (such as IPSec/PPTP/L2TP) for VPN tunnels.

New Features

- Support 200 VPN tunnels.

Improvement

- Improved: Allows to setup blank administrator password in Quick Start Wizard.
- Corrected: WAN connection (PPP IPv6) failed due to unknown reason.
- Corrected: No data could be recorded on Syslog utility if Destination Port on SysLog / Mail Alert Setup was not set by default value.
- Corrected: Bandwidth Limit could not limit the data traffic if IP Routed Subnet was enabled.
- Corrected: L2TP over IPSec failed to work.

Known Issue

- None.
