Release Note for Vigor3910 Series

Firmware Version:	3.9.2.1
Release Type:	Normal
Applied Models:	Vigor3910

New Features

- Support max. session up to 1000K (on System Maintenance>>NAT Sessions).
- Support to be managed by VigorACS 2.

Improvement

- Improved: Improvement of system stability for VPN connection.

Known Issue

- Once upgraded to 3.9.2.1, configure IP Bind MAC settings and then get downgraded to 3.9.1 again. The IP Bind MAC settings will disappear. So make sure the IP Bind MAC settings is backed up before downgrading.

Note

The following items will be ready in the future release:

- USB Applications
- WAN >> Multi-VLAN >> Port-based bridge

The following traffic will be accelerated (in the fast path) in the future release:

- All IPv6 traffic
