Release Note for VigorAP 1000C

Firmware Version:	1.3.3
Release Type:	Normal
Applied Models:	VigorAP 1000C

VigorAP 1000C is a ceiling-mount Wi-Fi for business networks. As a tri-band AP, it provides an extra 5GHz Wireless band which increases the supported number of wireless devices. In Mesh mode or Range Extender mode, this extra band can also be dedicated as the Uplink band to the Internet. VigorAP 1000C is suitable to construct a small Wireless network.

New Features

- None.

Improvement

- Improved: Improvement for SNMP function.
- Improved: Improve the WebUI of Mesh >> Mesh Setup for Mesh Root.
- Improved: Modify Draytek AP A-Band Channel List for Australia and Thailand.
- Improved: Display SSID for 5GHz wireless station on Station List>>Clients List.
- Corrected: An issue of wireless security 802.1x.
- Corrected: A security issue of DHCP server.
- Corrected: An issue of Access Control not working when wireless security was WPA3-Personal.

Known Issue

- None.

Note

- The throughput figures are maximum, based on DrayTek internal testing with optimal conditions. The actual performance may vary depending on the different network conditions and applications activated.
