Release Note for VigorAP 802

Firmware Version:	1.4.4
Release Type:	Normal
Applied Models:	VigorAP 802

VigorAP 802, a 11ac dual-band wall plug AP, can be used to bridge any Ethernet device to a network. It is not necessary for you to spend time and money installing expensive Ethernet cable to share your Internet connection or HD / SD video stream at home. Just plug VigorAP 802 to the power outlet on the wall. You can get stable and fast speed for data transmission at any site in your house.

New Features

- None.

Improvement

- Improved: Add a note to remind the user that the system will reboot after finishing the firmware upgrade.
- Improved: Add a note and a pop-up alert to notify the user not to enable Management VLAN when using the Mesh function.
- Improved: Add new options to enable or disable the HTTP server, HTTPS server, and/or the function of Enforce HTTPS Access.
