

Release Note for VigorAP 900

Firmware Version: 1.1.8.1
Release Date: July 15, 2016
Applied Models:
VigorAP 900

VigorAP 900, the concurrent dual band wireless (2.4G/5G) access point, offers high-speed data transmission. With this high cost-efficiency VigorAP 900, computers and wireless devices which are compatible with 802.11n/802.11a can connect to existing wired Ethernet network via this VigorAP 900, at the speed of 300Mbps. Easy install procedure allows users to setup a network environment in very short time - within minutes, even inexperienced users. Also, VigorAP900 is a Power over Ethernet Powered Device which adopts the technology of PoE for offering power supply and transmitting data through the Ethernet cable.

New Features

- Support HTTPS for TR-069.

Improvement

- Corrected: PC (Win10) couldn't re-connect to VigorAP wireless with EAP-TLS RADIUS EAP Type in WPA2/802.1x security mode.
- Improved: Modify the display icons for MDM (Mobile Device Management) function.
- Corrected: Device name of VigorAP did not come into VigorACS.
- Corrected: Error occurred while executing speed test.
- Corrected: Even if WLAN LEDs were disabled by default, LEDs would be on when Wi-Fi down schedule was activated.
