

Release Note for VigorAP 903

Firmware Version:	1.3.4
Release Type:	Normal
Applied Models:	VigorAP 903

In DrayTek access point family, VigorAP 903 is the first device supporting mesh network. With newly designed web user interface, VigorAP 903 supports operation modes of the access point, mesh root, mesh node and range extender, offers static WDS connections for each OP mode, and use the same OP mode for all wireless band at the same time. In addition, users can check the AP status from VigorAP APP (iOS and Android) easily.

New Features

- None.

Improvement

- Improved: Add Device Object and integrate with WLAN access control & Schedule.
- Improved: Support VID (VLAN Tag) for wireless clients via mesh network.
- Improved: Support IEEE 802.11r.
- Improved: Support a speed-test between Mesh node & Mesh root via web.
- Corrected: RADIUS server profile page corrupted when adding users.

Known Issue

- None.

Notes

- None.
