

Release Note for VigorAP 903

Firmware Version:	1.3.5
Release Type:	Normal
Applied Models:	VigorAP 903

In DrayTek access point family, VigorAP 903 is the first device supporting mesh network. With newly designed web user interface, VigorAP 903 supports operation modes of the access point, mesh root, mesh node and range extender, offers static WDS connections for each OP mode, and use the same OP mode for all wireless band at the same time. In addition, users can check the AP status from VigorAP APP (iOS and Android) easily.

New Features

- Support connection with different channels under Range Extender mode.

Improvement

- Improved: Support to send alert emails via Gmail.
- Improved: Mobile Device Management web improvement.
- Improved: Increase CLI command buffer to 256 characters.
- Improved: Block illegal repeater devices (Wireless LAN (2.4GHz & 5GHz) >> Advanced Setting).
- Improved: Support Mesh>> Advance Config Sync to improve the Mesh configuration synchronization.
- Corrected: The issue of mesh node management by VigorACS server.

Known Issue

- None.

Notes

- None.
