

## Release Note for VigorAP 918R Series

Firmware Version:	1.3.0
Release Type:	Normal
Applied Models:	VigorAP 918R, VigorAP 918RPD

VigorAP 918R Series is a compact outdoor wireless access point. It provides combined speeds of up to 1.3 Gbps and a capacity of 200+ active users. The series includes an RPD model, which is equipped with a PoE-Out port to deliver connectivity and power to another network device, such as an IP camera, and the internal 5GHz directional patch antenna can enhance the wireless performance for long-range point-to-point connection.

### New Features

This is an initial release for VigorAP 918R.

- Support the temperature range from -40° to 70°C.
- Support up to 256 active users.
- Support IP-67 rated water and dust resistant.
- Support transmission rate up to 867 Mbps at 5GHz, 400 Mbps at 2.4GHz.

### Improvement

- None.

### Known Issue

- None.
