

Release Note for VigorConnect

Software Version:	1.3.0
Release Type:	Normal
Applied System:	Windows 7, 8, 10
Applied Models:	All VigorAPs (AP700, AP800, AP900 not included) VigorSwitch P2500/G2500, P2280/G2280, P2280x/G2280x, P2121, P1280/G1280, G1080, P1092

VigorConnect is a software which provides centralized AP management and switch management for TR-069 based devices. VigorConnect has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of the managed devices.

New Features

- Support the management for VigorSwitch (e.g., VigorSwitch G1080/P1092).

Improvement

- Improved: Add a function of searching devices on the Dashboard, New Devices field.
- Improved: Remove the searching result of VigorSwitch(es) on Configuration >>Wireless Wizard
- Improved: Add the options of System Log and Login Log on SYSTEM MEMU>>System>>Logs.
- Improved: Add the check box for each option to enable / disable the configuration setting for AP profile.

Known Issue

- None.
