VigorConnect is a software which provides centralized AP management and switch management for TR-069 based devices. VigorConnect has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of the managed devices.

New Features

- None.

Improvement

- Improved: Add the VPN parser functions to Syslog.
- Improved: Add the Service Control and Reboot System functions.
- Improved: Add the Universal Repeater configuration page for the Range Extender mode.
- Improved: Support VPN functions (e.g., Monitoring>>VPN, Configuration>>VPN Analytics Setup).

Known Issue

- An issue that viewing Flow with FireFox (HTTPS) would block illegal HTTPS certificate issued by Grafana.
