

## Release Note for VigorConnect

Software Version:	1.9.4
Release Type:	Regular – Upgrade recommended when convenient, as it includes general improvements and optimizations
Applied System:	Windows 7, 8, 10, 11 / Linux / Raspberry Pi / Docker / Arm64Docker/Vigor3912S
Applied Models:	All VigorAPs and VigorSwitches. Refer to Compatible Devices at <a href="https://www.draytek.com/products/vigorconnect/">https://www.draytek.com/products/vigorconnect/</a>

VigorConnect is a local network management software that provides centralized AP/switch management for LAN devices. VigorConnect has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of the managed devices.

### New Features

- Support the Brute Force Protection function.
- Support to manage VigorSwitch G2542x / P2542x / P2542xh.

### Improvement

- Improved: Upgrade Grafana.
- Improved: Improve the WUI security.
- Improved: Improve TR-069 Object Instance Number Consistency for VigorConnect.

### Known Issue

- An issue that viewing Flow with FireFox (HTTPS) would block illegal HTTPS certificate issued by Grafana.
