

Release Note for VigorFly 210 Series

Firmware Version: 1.3.3

Release Date: November 04, 2013

Applied Models:

VigorFly 210/ VigorFly 210V

VigorFly 210 series is a compact broadband router with 802.11n WLAN network. Its Ethernet WAN port can connect to VDSL/VDSL2/GPON/G.SHDSL /ADSL2+/ADSL/cable modem while you have fixed line. The NAT throughput can easily manage time-critical multimedia streaming. It's easy for family or friends to hook up PCs via embedded 10/100 Ethernet LAN switch to enjoy multimedia applications. Two antennas provide you with speedy WLAN networking. If you are out of coverage of fixed line, you can directly plug 3.5G USB modem to USB port on VigorFly 210 series. Or, you can use WiMAX USB modem with VigorFly 210 series. The sharing 3.5G / WiMAX/LTE connection accommodates adequate downstream/upstream capacity for residential needs.

New Features

- None.

Improvement

- Fixed: Error in the driver stress test with Huawei E398/E3276.
- Fixed: Cannot access checkup.dyndns.org which causes DDNS disabling to work.
- Improved: Add default configuration for Nicaragua hardware.

Known Issue

- IPv6 https web server could not work with IE9 due to the problem of compatibility.

Notes

Modifications

- None
