

Release Note for VigorLTE 200 Series

Firmware Version:	3.9.8.2
Release Type:	Normal
Applied Models:	VigorLTE 200n

VigorLTE 200 Series is a single WAN router with two WAN interfaces, including main LTE WAN and selectable Ethernet WAN. It offers features including VPN, Firewall, Content Filtering, and central management solution for Vigor access points.

New Features

- None.

Improvement

- Improved: Support UDP Broadcast over VPN (LAN to LAN).
- Corrected: An issue with the router rebooting when LTE (failover) was active.
- Corrected: An issue with the SIM card blocked due to the duplicated LTE registration.
- Corrected: A DHCP relay issue with WAN IP misused as Relay Agent Address for VPN.
- Corrected: An issue with the router not assigning a static IP to the OpenVPN client when using remote dial-in profile #21.

Known Issue

- None.

Notes

- None.
