

Release Note for VigorPro 5510 Series

Firmware Version: 3.3.4

Built Date: November 25, 2009

Applied Models: VigorPro 5510 Series

New Features

- New Web UI style.
- Support up to 50 SSL VPN tunnels
- Support TR-069
- Support LDAP (for VPN only).
- Support WCF (Commtouch solution)
- Support 3G modem, D-Link DWM156
- Support AES encryption for phase I
- Add the type of Torrent in Restrict Web Feature. Forbid customers downloading BT file.

Improvement

- Corrected: Cannot perform signature upgrade from WAN2 while WAN1 connection fails or connects to Intranet.
- Corrected: Signature download failed frequently due to the shortage of VigorPro signature server construction.

Known Issue

- None

Notes

Modifications

- SSTP Authentication of SSL VPN is terminated.

- Surfcontrol(CPA) service is terminated.
