

Release Note for VigorSwitch P2121

Firmware Version:	2.6.6
Release Type:	Normal
Applied Models:	VigorSwitch P2121

The L2 Managed Switch VigorSwitch P2121, a PoE switch with 8 ports + 4 SFP ports, is a standard switch that supports IEEE 802.3az, Energy-Efficient Ethernet, and provides power saving feature. It can efficient saving the switch power with auto detect the client idle and cable length to provide different power.

New Features

- None.

Improvement

- Improved: Adjust router's self-signed certificate to comply with new browser restrictions. Start on 2020-09-01, many client OSes/browsers will enforce publicly trusted TLS server certificate lifetime to 398 days or less, and connections will be rejected if the certificates violated this rule, so this firmware patch will automatically re-sign all the self-signed certificates lifetime to 395 days (was 2 years or longer in older versions).
- Improved: Support to display statistics/counters information for each port on Status.
- Improved: Support to change the port number for HTTP management on System Maintenance>>Access Manager.

Known Issue

- None.
