

利用imageUSB程式作UMAIL_V5的USB開機碟

最近更新: 2024年2月27日 / 點擊數: 17

請先去網站下載imageUSB

[Tools for OSForensics - ImageUSB - Write an image to multiple USB Flash Drives](#)

再到網站上下載UMAIL V5 USB系統檔

http://wan2.ublink.org/UMail_v5/ISO/%e8%a3%bd%e4%bd%9cUSB_DOM/umailV5-usb-1G.bin

如因網頁安全無法下載.bin檔案,可以改下載壓縮檔再解壓縮使用.

http://wan2.ublink.org/UMail_v5/ISO/%e8%a3%bd%e4%bd%9cUSB_DOM/umailV5-usb-1G.zip

http://wan2.ublink.org/UMail_v5/ISO/%e8%a3%bd%e4%bd%9cUSB_DOM/umailV5-usb-1G.7z

請開啟imageUSB程式,接上要燒錄的USB碟.

Create and write an image of a USB drive

Step 1: Select the USB drive(s) to be processed

- USB DISK 3.0 (Serial: E7CF12B16070 Disk: 1, Part. Type: GPT, Size: 58.61 GB, Volumes: E)
E: Label: data, FileSystem: NTFS, Size: 58.61 GB
- USB Flash Disk (Serial: AA000000000000489 Disk: 2, Part. Type: GPT, Size: 117.81 GB, Volumes: NA)
Label: None, FileSystem: Unknown, Size: 18.0 MB

Select All Unselect All Drives Selected: 0 Refresh Drives

Step 2: Select the action to be performed on the selected USB drive(s)

- Write image to USB drive
- Create image from USB drive
- Zero USB drive
- Reformat USB drive (Windows Vista or later)

Available Options

- Post Image Verification
- Extend/Add Partition (NTFS Only)
- Boot Sector(s) Only
- Beep on Completion

Format Option: NTFS ▾

Step 3: Select the image (.bin, .img or .iso) file to write to the USB drive(s)

<Please select a .bin, .img or .iso file> Browse

Step 4: Click the 'Write' button to begin...

Write Overall progress

Exit

完成資料燒錄後關閉程式.並在WINDOWN卸載USB.

再把USB拿去機器當USB開機碟.
