

Release Note for iOS SMS APP

| | |
|-------------------|-------------------|
| Software Version: | 1.0.0 |
| Release Type: | Normal |
| Applied System: | iOS 11.0 or later |

It is a mobile application that allows users to send SMS messages via SIM card in Vigor LTE routers. In addition, the APP allows users to switch among multiple Vigor LTE Routers to send personalized messages easily and quickly.

New Features

- This is an initial release for DrayTek iOS SMS APP.
Below shows the key benefits:
 - Intuitively and easily add routers into the application.
 - Send and receive SMS without physical connecting to routers.
 - Monitor routers LTE connection status.
 - Manage multiple routers at the same time.
- Support routers (with LTE embedded):
 - Vigor2862 (with firmware 3.9.4 and above)
 - Vigor2926 (with firmware 3.9.3.1 and above)
 - Vigor2620 (with firmware 3.9.0 and above)
 - VigorLTE 200n (with firmware 3.9.0 and above)
 - Vigor2860 (with firmware 3.8.9.7 and above)
 - Vigor2925 (with firmware 3.8.9.8 and above)

Improvement

- None.

Known Issue

- None.
