Fax: 886-3-5972121

E-mail: [support@draytek.com](mailto:support@draytek.com)

**30 DAY FREE TRIAL** included with Vigor router

## Activate Web Content Filter Free Trial

### STEP 1

In IP Filter / Firewall Setup > Web Content Filter Setup, click the link "Activate Free Trial and Purchase Subscription".

### STEP 2

A new window will pop up to activate the Web filter function of your router. Click "Business Set-up" or "Home Set-up".

### STEP 3

Fill in Name and E-mail address fields. Check the "I have read and accepted the Terms & Conditions below" box and click "Activate Free Trial".

Step 1  
Step 2  
Step 3

Lost productivity, strangled network bandwidth, legal liability and imported viral infection are just some of the potential threats from unmanaged Web access. Activating your Web Filter will give you back the control of your organisations network!

To enable your **30 day FREE TRIAL** or **Purchase a subscription now**, please enter your name and e-mail address below. On receipt, you will be sent a confirmation e-mail providing you with a link to activate your license.

First Name \* draytek  
Last Name \* mkt  
E-mail address \* info@draytek.com  
Confirm E-mail address \* info@draytek.com

☒ I have read and accepted the [Terms & Conditions](#) below

### STEP 4

Click Close to exit the window. Be sure that any anti-spam measures you have in place do not block emails from support@powernetix.com as your confirmation email will come from that address.

Step 1  
Step 2  
Step 3

**Registration process is now complete.**

Your confirmation e-mail will arrive shortly. Upon receipt, please open the e-mail and click the supplied link to confirm your registration.

You will then need to return to the Web Filtering set-up page to configure the most productive and safe environment for your organisation.

### STEP 5

You should receive a confirmation email within a few minutes from PowerNetIX Ltd. Click on the link in the email to confirm your registration. Your 30 day trial is now active.

Dear draytek,

Thank you for registering for your 30 day FREE TRIAL. By activating your Web Filter, you will regain control of your organisation's network.

Please click on the link below to confirm your registration.  
[http://surfcontrol.powernetix.com/vc2/othermailconfirm.php?key=52c0e8fa527474b6ce4fa69c3649f178&type=business\\_thankyou](http://surfcontrol.powernetix.com/vc2/othermailconfirm.php?key=52c0e8fa527474b6ce4fa69c3649f178&type=business_thankyou)  
You will now need to return to the Web Filtering set-up page to configure the most productive and safe environment for your organisation.

## Setup your Web Content Filter

### STEP 1

Ensure that Internet access works correctly before enabling the content filter. If your Vigor router is connected to another firewall be sure that it is not blocking UDP Port 9020.

### STEP 2

Chose your nearest CPA server from the list.

### STEP 3

For test purposes, you may want to select all categories; then you should not be able to access any external web sites. You will normally want to block 'Uncategorised' Sites; tick the checkbox for that.

☒ **Enable Web Content Filter**

Groups: Child Protection, Leisure, Business  
Categories (Tick to block, Untick to unblock): Chat, Gambling, Sex, Criminal, Hacking, Violence, Drugs/Alcohol, Hate speech, Weapons, Games, Entertainment, Food, Lifestyle, Motor Vehicles, Shopping, Streaming Media, Travel, Computing/Internet, Finance, Job Search/Career, Politics, Real Estate, Reference, Remote proxies, Search Engine, Web Mail

### STEP 4

If you wish the content filter to be active only at certain time, you can enter a schedule number. Set the schedule times from the Call Schedule Setup menu. If you do not enter a schedule number, the content filtering is always active.

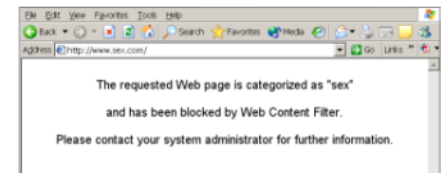

**Time Schedule**

Scheduler defined in Call Schedule Setup (1-15) => [ ] [ ]

Note: Action and Idle Timeout settings will be ignored.

### STEP 5

Close down any open browsers and then open a new browser windows and try to access a web site within a category you have blocked. A warning page should appear instead of the web site.

### NOTE

- You can use syslog to receive Web Content Filter activity
- The web management page of the router will never be blocked.
- You can click on "Test a site to verify whether it is categorised" to test what category a web site is. All web sites not in the SurfControl database will be categorized as "Uncategorized".
- Web Content Filtering cannot be applied to web access through a Proxy or Socks server
- When your free trial expires or your subscription lapses, all web sites will be permitted again.
